

**REGULATORY NEEDS + PERFORMANCE**

# INDUSTRIAL EQUIPMENT OEM PAINT SPRAYER

## AVIENT SOLUTION

Smartbatch™ Formulation: Cesa™ Flame Retardant Additives and OnColor™ Colorants

## WHY AVIENT?

- Achieved all flame rating requirements and assisted with regulatory approvals
- Developed a proprietary Smartbatch solution that minimized potential effects from interaction with current bulk chemistries
- Provided needed support with qualification process and testing requirements, saving time and cost
- Afforded on-going support with A2LA test labs, sampling, and lot-to-lot consistency with exacting performance

## LEARN MORE

## KEY REQUIREMENTS

- Meet or exceed UL94 V-2 flame rating
- Able to interact with existing bulk chemistry without compromising functionality or brand color and aesthetics
- Deliver cost targets while providing operational efficiency and a working capital strategy
- Accelerate product development timeline, and provide UL94 testing verification prior to production trials
